ASSIGNMENT-2

MARKETING MANAGEMENT (F010303TN)
UNIT III | AI-BASED ASSIGNMENT

INSTRUCTIONS

1. Attempt all questions.
2. The assignment must be completed only on **A4-size sheets.**
3. The **first page** should contain:
    - **Name**
    - **CRN**
    - **Section**
    - **Subject**
4. Students may use **any AI tool such as ChatGPT, Gemini, Claude, Copilot, etc.** to complete the assignment.
5. **For each question, write the AI prompt used** before presenting the answer.
6. Students must **verify the important information generated by AI** using reliable/official sources wherever required.
7. The last date to submit is **28th September 2026.**

ASSIGNMENT QUESTIONS-

Q1. Choose **ANY TWO brands/companies** (e.g., Nykaa, Zomato, Maruti Suzuki, Patanjali, Netflix).

Use AI to identify and compare their **market segmentation strategy** on:

- Bases of segmentation used (demographic, geographic, psychographic, behavioural)
- Profile of the target segment(s) identified
- How the marketing mix is adapted for that segment
- Effectiveness of the segmentation approach

Also answer:

"Which segmentation approach do you find most effective, and why?"

Write the AI prompt used with your answer.

Q2. Use AI to analyse the **targeting strategy** (undifferentiated, differentiated, concentrated/niche, or micromarketing) followed by **ONE real company** of your choice.

Also answer:

"In your opinion, is this the right targeting strategy for the company's industry? Give two reasons."

Write the AI prompt used with your answer.

Q3. Use AI to identify **ONE real brand** that has undergone **positioning or repositioning** (e.g., Fevicol, Maruti 800 to Alto, Airtel, Cadbury, Raymond).

Find out:

- What was the brand's original positioning?
- Why did the brand reposition itself?
- What changes were made (messaging, target audience, marketing mix)?
- What was the outcome, and what could the brand have done differently?

Write the AI prompt used with your answer.

Q4. Use AI to research the **value proposition** of **ONE real product or service** in a competitive market (e.g., a smartphone brand, a food-delivery app, an insurance product, an EV brand).

Find out:

- What is the core value proposition offered to customers?

- Who is the target customer for this value proposition?
- How does it differentiate the brand from its key competitors?

Also suggest **three ways** the company could strengthen its value proposition further.

Write the AI prompt used with your answer.
